DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to anticipate or make obvious the method of claims 1-17 and 30-33 or the structure of claims 18-23 and 34-35, including, *inter-alia*, monitoring a patient's state of anesthesia or sedation by obtaining both EEG and bioimpedance signal data, respectively corresponding to the cortex and sub-cortex, calculating a set of indicators based on the signals, and producing a composite indication based on the indicators.

Gevins (US Patent 5447166) uses cortical and sub-cortical signals, such as EEG and bioimpedance, to monitor a patient's neurological activity, but the monitoring comprises the patient actively performing tasks in response to a provider's request, which is not possible if the patient is anesthetized or sedated.

Giuffre (US Patent 6042548) discloses using both EEG and bioimpedance signals to monitor an anesthetized or sedated patient. However, the EEG signals are used to train a system to rely only on the bioimpedance signals for future monitoring.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be

filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 10 has been amended from "a first indicator based comprising" to read --a first indicator comprising-- in order to increase the clarity of the claim.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen E. Toth whose telephone number is 571-272-6824. The examiner can normally be reached on Monday through Friday.
